DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II, claims 3-12, in Paper No. 8 received October 20, 2003 is acknowledged.
2. Claims 1, 2, 13 and 14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kolls, US 6,389,337.

Kolls discloses ordering parts, e.g. Fig. 20, cols. 55-56, from a database over the Internet. Kolls does not specifically disclose fluid machinery parts being ordered. To have provided ordering fluid machinery parts for Kolls would have been obvious to one of ordinary skill in the art. Doing such would provide an obvious substitution of compatible parts for one of ordinary skill in the art. Also, it is noted that vehicle replacement parts are known to comprise items that include fluid machinery parts. To include fluid machinery parts in the database of Kolls would have been obvious to one of ordinary skill in the art.

7. Further pertinent references of interest are noted on the attached PTO-892.

8. Applicant's Information Disclosure Statement has been reviewed. Note attached PTO-1449.
